Discover More about the 300-715 Certification

Are you interested in passing the Cisco 300-715 exam? First discover, who benefits from the 300-715 certification. The 300-715 is suitable for a candidate if he wants to learn about Security. Passing the 300-715 exam earns you the Cisco Certified Network Professional Security title.

While preparing for the 300-715 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The 300-715 PDF contains some of the most valuable preparation tips and the details and instant access to useful [300-715 study materials just at one click](#).

Cisco 300-715 CCNP Security Certification Details:

Exam Name	Implementing and Configuring Cisco Identity Services Engine
Exam Number	300-715 SISE
Exam Price	\$300 USD
Duration	90 minutes
Number of Questions	55-65
Passing Score	Variable (750-850 / 1000 Approx.)
Recommended Training	Implementing and Configuring Cisco Identity Services Engine (SISE)
Exam Registration	PEARSON VUE
Sample Questions	Cisco 300-715 Sample Questions
Practice Exam	Cisco Certified Network Professional Security Practice Test

300-715 Syllabus:

Section	Weight	Objectives
Architecture and Deployment	10%	<ul style="list-style-type: none"> - Configure personas - Describe deployment options
Policy Enforcement	25%	<ul style="list-style-type: none"> - Configure native AD and LDAP - Describe identity store options <ul style="list-style-type: none"> • LDAP • AD • PKI • OTP

Section	Weight	Objectives
		<ul style="list-style-type: none"> • Smart Card • Local - Configure wired/wireless 802.1X network access - Configure 802.1X phasing deployment <ul style="list-style-type: none"> • Monitor mode • Low impact • Closed mode - Configure network access devices - Implement MAB - Configure Cisco TrustSec - Configure policies including authentication and authorization profiles
Web Auth and Guest Services	15%	- Configure web authentication - Configure guest access services - Configure sponsor and guest portals
Profiler	15%	- Implement profiler services - Implement probes - Implement CoA - Configure endpoint identity management
BYOD	15%	- Describe Cisco BYOD functionality <ul style="list-style-type: none"> • Use cases and requirements • Solution components • BYOD flow - Configure BYOD device on-boarding using internal CA with Cisco switches and Cisco wireless LAN controllers - Configure certificates for BYOD - Configure blacklist/whitelist
Endpoint Compliance	10%	- Describe endpoint compliance, posture services, and client provisioning - Configure posture conditions and policy, and client provisioning - Configure the compliance module - Configure Cisco ISE posture agents and operational modes - Describe supplicant, supplicant options, authenticator, and server

Section	Weight	Objectives
Network Access Device Administration	10%	- Compare AAA protocols - Configure TACACS+ device administration and command authorization

Broaden Your Knowledge with Cisco 300-715

Sample Questions:

Question: 1

What are two benefits of TACACS+ versus RADIUS for device administration?

(Choose two)

- a) TACACS+ provides the service type, and RADIUS does not
- b) TACACS+ uses UDP, and RADIUS uses TCP
- c) TACACS+ encrypts the whole payload, and RADIUS encrypts only the password.
- d) TACACS+ supports 802.1X, and RADIUS supports MAB
- e) TACACS+ has command authorization, and RADIUS does not.

Answer: c, e

Question: 2

Which of the following is a list of identity sources that are checked in order as part of authentication?

- a) Authentication source
- b) Identity database
- c) Identity source sequence
- d) Authentication database

Answer: c

Question: 3

In the ISE command-line interface, what command can be entered to show the running application processes?

- a) configure application ise
- b) show application status ise
- c) show cpu
- d) show processes

Answer: b

Question: 4

With what types of authentication types can MS-CHAPv2 be used when the identity store has an LDAP connection to Active Directory?

- a) MS-CHAPv2 cannot be used with ISE when the identity store is LDAP
- b) Machine authentication can be use
- c) User authentication can be used
- d) Both user and machine authentication can be use

Answer: a**Question: 5**

What types of internal identity stores are used in ISE?

(Choose two.)

- a) User database
- b) Endpoint database
- c) System database
- d) Admin database

Answer: a, b**Question: 6**

Which permission is common to the Active Directory Join and Leave operations?

- a) Create a Cisco ISE machine account in the domain if the machine account does not already exist
- b) Remove the Cisco ISE machine account from the domain.
- c) Set attributes on the Cisco ISE machine account
- d) Search Active Directory to see if a Cisco ISE machine account already exists.

Answer: d**Question: 7**

When an endpoint is quarantined with Adaptive Network Control (ANC), what happens to the endpoint?

- a) The endpoint is blocked from accessing the network, based on MAC address
- b) The endpoint is given Internet-only access until it is unquarantined
- c) Nothing happens without a corresponding security policy
- d) The endpoint is blocked from accessing the network, based on IP address

Answer: c

Question: 8

Prior to the introduction of MAB, a switch port with a non-802.1X client would be configured without 802.1X. Why did this present issues?

- a) A broadcast storm would be created as the endpoint device was plugged in to the interface
- b) A non-802.1X client would still not be able to gain network access
- c) A rogue user could unplug the non-802.1X endpoint and gain unauthorized access to the network
- d) Rebooting the device would cause the switch port to go into an error disable state

Answer: c

Question: 9

How is an identity store sequence processed?

- a) Bottom-to-top
- b) Left-to-right
- c) Top-to-bottom
- d) In any order

Answer: c

Question: 10

Cisco ISE identity stores are used to authentication which of the following?

(Choose two.)

- a) Endpoints
- b) AD security groups
- c) RADIUS
- d) Users

Answer: a, d

Avail the Study Guide to Pass Cisco 300-715 CCNP Security Exam:

- Find out about the 300-715 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.

- Once you are done exploring the [300-715 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the 300-715 training. Joining the Cisco provided training for 300-715 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [300-715 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. 300-715 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

Passing the 300-715 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the 300-715 Certification

NWExam.com is here with all the necessary details regarding the 300-715 exam. We provide authentic practice tests for the 300-715 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on NWExam.com for rigorous, unlimited two-month attempts on the [300-715 practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Cisco Certified Network Professional Security.
